Mohawk Renewal: *sustainability with a story*

Mohawk Renewal was born out of a desire to redefine the contours of how we source fiber and expand the existing definition of sustainable papermaking. By rediscovering old fiber sources like hemp, straw and cotton rag, we uncovered a new path forward. You might say we looked to the past to discover the future.

Mohawk Renewal Hemp is available in clean white, fibre white and flower shades

- Clean white 30% hemp fibre + 70% FSC fibre
- Fibre white 30% hemp fibre + 30% PCW fibre + 40% FSC fibre
- Flower 30% hemp fibre + 30% PCW fibre + 40% FSC fibre
